

NEATO GESTURE CONTROL

FEATURES

- **Gesture control using MediaPipe and OpenCV**
- **Fixed behaviours like driving in a square or triangle controlled using odometry**
- **Computer Vision can identify:**
 - **Numbers 1-5**
 - **Common hand gestures (fist, ok, peace, etc...)**
- **Hand tracking and hand shape recognition**

We have also created a mode where the user can draw a shape in the air using their finger and the Neato will follow the path created by the shape.
